Modules mounting pitch:

horizontal = 1'741 mm
vertical = 1'016 mm

Total dimension module field:

horizontal = x modules mounting pitch + 18 mm
vertical = x modules mounting pitch + 32 mm

Total dimension module field with flashings side left an right:

horizontal = module field + 282 mm
vertical = module field + 340 mm

Attention !
- Without considering wind and snow load according to SIA 263
- Layout planning with wind and snow loads is recommendet with software proSolrif (www.schweizer-metallbau.ch)
